

HOW TO CLEAN THE BATHTUB

Scan QR or visit:
meide.sg/how-to-clean-the-bathtub/

1. WIPE DOWN & CLEAN DRAIN

Wipe down components (faucets, taps, hoses etc.) with a damp cloth & cleaning detergent like you did for the shower head. Next, clean the toilet drain.

2. CLEAN THE BATHTUB

Using a bathtub cleaning detergent or dish soap and a wet sponge, wipe the bathtub. You may use a radial motion (from left edge to right edge). Leave to sit for 10-20 mins before rinsing off.

3. REMOVE STUBBORN STAINS

Repeat the above steps with diluted vinegar OR bleach (**never use both together**). After covering the bathtub with vinegar, you may sprinkle baking soda, scrub and rinse.
