

How to Clean **CABINETS & SHELVES**

PACK & PREPARE

Put away all loose items and prepare the cleaning solution : 1 tsp soap, 2 tsp baking soda and water. You can opt for vinegar instead of water too.

WIPE WITH A GENTLE TOOL

With a soft rag and solution, wipe every side and corner of the cabinets and shelves. Choose a cleaning tool that will not leave any scratches!

AIR & TOUCH UP

Finally, ensure that you leave the area to air & dry completely! You may choose to touch up the surfaces with commercial polishing solutions.

Note: Don't forget to clean toilet roll holders, towel holders, soap dispensers, hooks, hand dryers, and any other decorative or random fixtures that might be in your bathroom
